**Attainment of Programme Outcomes and Course Outcomes are evaluated by the institution.**

- At the commencement of the semester a meeting is conducted at the department Level to chalk out the programmes for the ensuing semester.
- Slow learners are identified through class assessments and continuous learning activities.
- Identification of slow learners is followed by interaction with parents to ascertain the possible causes and suggest means to rectify them
- Active alumni base offers moral and financial support to the weaker student by constant contact with the department
- Alumni encouragement and support motivate students to channalise to specific areas on completion of course which in turn is reflected in their results.
- The dept boosts students offering prizes to augment their academic performances
- The Dept lab is made available to students at all working hours to facilitate them to explore possibilities in practical applications and solve problems on a wider scale
- Faculty offers the students an insight into avenues open for them on completion of graduation.
- The Dept enables to continue Higher education in reputed institutions.
- Keen interest is taken to incorporate values in life through the study of core subjects which enhances logical thinking. This enables smooth and apt capability to make decisions
- Consistently the graduated students opt for higher studies mainly due to the motivation and support of the faculty and alumni.

1. Hypothesis

The hypothesis is major to assumption of IT is made by population parameter. The hypothesis applicable for entire population.

Two types of hypothesis

1. Null hypothesis
2. Alternative hypothesis

1. Null hypothesis

Null hypothesis is the simplest null hypothesis. It is difference between population parameter and sample statistics.

Null hypothesis =  $H_0$  it is equals to = 100

2. Alternative hypothesis

Alternative hypothesis is always assume it is not equal to 100

Alternative hypothesis =  $H_a$  it is not equal to 100

Q1) Introduction:

An indifference curve which means, a line shows the various combination of two commodities which yields same level of satisfaction to the consumer.

Table:

Combination	X Commodity [Banana]	Y Commodity [Mangoes]	MRS	Satisfaction
A	1	20	-	= 2
B	2	15	5	= 2
C	3	10	4	= 2
D	4	8	3	= 2
E	5	6	2	= 2
F	6	5	1	= 2

The table explains, the combinations from A to F. when a rational consumer choose A combination, he get 1 Banana and 20 mangoes. In the same case, when he choose combination F, he get 6 Bananas and 5

I.1

Sampling is a part of population or universe. Sampling should be representative of all the features of the population. There are two types of sampling: Probability sampling and non-probability sampling. Example for probability sampling: selecting 10 students out of 100 students to find out the class performance. Sampling should be bias free unbiased.
