Innovation in Science Pursuit for Inspired Research

Innovation in Science Pursuit for Inspired Research is an innovative programme sponsored by the Department of Science and Technology for students of school in India. The basic objective of INSPIRE is to contribute to the growth of the country by enrichment of students' practical skills in the field of Science & Technology and also to help them to develop self-learning capability for completing and executing the Science and Technology projects of 1 & 2 years.

A striking feature of the INSPIRE programme is that it does not believe in conducting competitive exams for identification of talent of any kind. It believes in the efficacy of the existing educational structure for identification of talent. Every year about 80,000 students of top 1% performance in class 10th board examination and pursuing science at higher secondary level are being given an opportunity with healthy selection mechanism in the winter camp to experience the joy of innovation.

INTERNATIONAL SEA CLEANING DAY

International Sea Cleaning Day held at Panambur beach on 15th September 2018, 3 SD and 7 SW cadets have participated under the guidance of PI staffs and ANO of University College Mangalore, along with local peoples.

Plastic products are causing a great deal of harm to the ocean; it doesn't biodegrade that quickly and chemicals from them often are leached into the water where they are digested by marine life. Thousands of marine animals die every year because of plastic pollution and many seabirds, turtles and fish can become entangled in debris and we are all accountable for that.

Innovation in Science Pursuit for Inspired Research

Innovation in Science Pursuit for Inspired Research (INSPIRE) an innovative programme sponsored by the Department of Science and Technology for attraction of talent to Science. The basic objective of INSPIRE is to communicate to the youth of the country the excitement of creative pursuit of Science, attract talent to the Study of Science at an early age and thus build the required critical human resource pool for strengthening and expanding the Science and Technology system and R & D base.

A striking feature of the INSPIRE programme is that it does not believe in conducting competitive exams for identification of talent at any level. It believes in and relies on the efficacy of the existing educational structure for identification of talent. Every year about 50,000 Students of top 1% performers in class Xth board examination and pursuing science at higher secondary level are being given an exposure with leading scientists/academicians in the winter camp to experience the joy of innovations.

Road Show of Vittiya Abhiyana was held on 07-01-2017 in Hampanakatta Streets. Around 60 NSS trained volunteers participated. The road show was inaugurated by Dr. Udaya Kumar, Principal of University College Mangalore and is organised by the NSS officers Dr. Bharathi Pilar and Dr. Sanjay Annarao. Students were divided into 12 groups and they created awareness in public about the Cashless Digital Payment System as a part of Vittiya saksharatha Abhiyana. The purpose of the 'Vittiya Abhiyan' is to actively engage the youth/ students of Higher Education Institutions to encourage and motivate all payers and payees to use a digitally enabled cashless economic system for transfer of funds. Various options of digital transactions are presented here. They need to further educate their family members and people in their immediate surroundings and motivate them for digital transactions. NSS volunteers of the institute took up a major market and interact with shop owners, including vendors, and their associations with an objective of developing a cashless market focusing on each point of sale.
