This Program is intended to help each one of us to work to realize the institutional vision “to be the center for knowledge to all sections of the society”. In achieving this objective, understanding students and mastering the ways of guiding them is not only a necessity but also is crucial. Students need to be informed properly, guided and helped in sorting out priorities in the student life. Yet times, students look for guides, care takers, mentors and leaders who can inspire them. We teachers need to render ourselves fit for all those roles that our students are looking for in the teachers. To live up to the expectations of employer, and the taught, each one of should enjoy good health, discharge duties in a cordial environment, which we are capable of creating collectively. Institutional leadership should make conscious efforts in this direction. This FDP is a step in that direction.
