PRIVATE SECTOR CREDIT AND ECONOMIC GROWTH: EVIDENCE FROM YEMEN

□ Mr: Mohammed. H. A. Al-Shawesh*
Dr. Yathish Kumar**

ABSTRACT

The study aimed to investigate the role of Private Sector Credit and its impact on the Economic growth of Yemen, so secondary data from 1998 to 2018 is collected to analysing the effects of banks credit to Private Sector on economic growth. And data from 2009 to 2018 is used to understand the Private Sector Credit and distribution to economic sectors divisions, simple regression, descriptive and display data are used. The results revealed a significant relationship and statistically significant impact of credit to the private sector on GDP. Also, the private sector credit as a percentage of banks' total assets has decreased over time, while the credit to the private sector constituted less than 50% of the credit to the government. The distribution of credit to the economic sectors focused on imports financing trade in manufactured goods at a rate of only 26% and 22%, respectively. In comparison, agriculture and industry got 3% of each. Therefore, despite the weak economy and infrastructure and the banking sector in the current situation in Yemen, the credit provided to the private sector has a significant contribution to the economy in Yemen.

Keywords: private sector credit, Economic growth, economic sectors divisions, simple regression and Yemen.

JEL Classification: O11, O47, G21, E60.

1- INTRODUCTION

Funding is required by different people, economic organizations, and agents. Other types of institutions provide financial services divided into various institutes as funds and the capital market. Every country in the world has an economic and development policy that it follows or works to achieve its members' well-being. According to the country's needs and capabilities, this development policy requires setting out its outlines, represented in planning development projects. No matter how diverse the projects are, they need funding to grow and continue their lives, as the funding is considered as the running blood of the project, and from here, we can say that funding has an influential role in achieving the country's development policy by providing the

necessary capital to complete the projects.

In the money market, there are conventional and Islamic banks that provide financial services, and this involves directing money from the surplus spending to the deficient spending units of the economy, so the role of credit in economic development can be relied upon by various economic agents to enable them to meet their operational needs, purchase of machinery and equipment. Moreover, credit helps establish a reasonable business volume for expanding the business to take advantage of the economies of scale. It can also be achieved by substituting resources to prevent Economic activity from collapse, and the banking sector helps make these loans available through the mobilization of surplus funds from the savers who do not have immediate

जनवादीधारा का सशक्त कवि - नागार्जुन

डॉ. सुमा.टी.रोडवर्कर*

समकालीन कविता तो जनवादी धारा का सशक्त दस्तावेज है। इसी धारा के सशक्त हस्ताक्षर में नागार्जुन की गणना की जाती है। कबीर और सूर्यकांत त्रिपाठी निराला की परम्परा की कड़ी में आनेवाले तेजस्व और प्रेरणापुंज कवि नागार्जुन हैं। नागार्जुन आधुनिक युग के अति प्रसिद्ध कवि तथा सुचितक रचयिता हैं। जो जनवादी चेतना के प्रखरतम अधिष्ठाता हैं। उनकी रचनाओं में हम उस युग की यथार्थ छवि समाहित देखते हैं।

जनवाद शब्द अंग्रेजी के डेमोक्रेसी शब्द जनवाद का रूपान्तर है। जनतंत्र लोकतन्त्र, प्रजातन्त्र, लोकशाही आदि शब्द जनवाद का रूपान्तर हैं। भारत में स्वतन्त्रता-आंदोलन के समय एवं स्वतंत्रता प्राप्ति के बाद अनेक ऐसे विचारक हुए जिन्होंने समाजवाद की व्याख्या की जो कि जनवाद का ही समुन्नत रूप है। महात्मा गांधी, लोहिया और आचार्य नरेन्द्र देव आदि ऐसे भारतीय विचारक थे, जिन्होंने लोकतन्त्र में जनता के असीम अधिकारों से संपन्न होने की बात कही है। जो कवि धर्म निरपेक्षता, समानता, साम्प्रदायिकता, विषेध, शोषण आदि जनतांत्रिक अवधारणाओं से परिपूर्ण है वही जनवादी कवि है।

जनवादी कवियों ने अपनी कविताओं के माध्यम से समाज में नयी चेतना जागृत की है, नयी क्रांति की प्रेरणा दी है, शोषकों का पर्दाफाश किया, अत्याचार के विरुद्ध आवाज उठायी, साम्राज्यवाद का घोर विरोध किया है तथा मानव प्रेम का प्रसार किया है। ये सभी बातें हम नागार्जुन में स्पष्ट देख सकते हैं। आलोचक नामवर सिंह ने नागार्जुन को अपने समय के सबसे बड़ा जनकवि कहा है।

नागार्जुन को महानगर की आपा-धापी, चमक-दमक भी इन्हें अपने गाँव की मिट्टी से अलग नहीं कर पायी। उनके गाँव की मिट्टी, खेत-खलिहान वहाँ के लोग उन्हें हमेशा अपनी ओर आकर्षित करते हैं।

घोर निरजर में परिस्थिति ने दिया है डाल।

याद आता तुम्हारा सिन्दूर-तिलकित भाल

याद आता मुझे अपना वह तेरउनी ग्राम

याद आती लिचियों और आम

याद आते मिथिला के रुचिर भू-भाग
याद आते कमल, कुमुदिनि और तालमखान
यहाँ भी सच है, न मैं समुदाय
यहाँ भी है व्यष्टि औ समुदाय

किन्तु जीवन भर रहूँ फिर भी प्रवासी ही कहेंगे हाय।

'प्रेत का बयान' शिर्षक कविता में कवि ने एक आजाद भारत के मास्टर के आर्थिक परिस्थिति का वर्णन किया है। गाँव में सरकारी स्कूल के मास्टर की हालत आज भी वैसे ही है। वह तंगी में जीता है, उसे सही समय पर वेतन नहीं मिलता। अंत में ऐसी ही परिस्थिति में उसका पूरा परिवार खत्म हो जाता है पर वह अपना स्वाभिमान नहीं छोड़ता। प्रेत का बयान के माध्यम से हम नागार्जुन की जनवादी मान्यताओं को परक सकते हैं

किन्तु भूख या क्षुधा नाम हो जिसका
ऐसी किसी व्याधि का पता नहीं हमको

सावधान महाराज ,

नाम नहीं लीजिएगा

हमारे समक्ष फिर कभी भूख का !!

नागार्जुन की प्रत्येक कविता में यह स्पष्ट हो जाता है कि वे सच्चे अर्थों में जनकवि हैं, जो सामान्य जन के बीच से पैदा हुआ है। उन्होंने अपने मुख पर अतिमानव या लोकोत्तर मानव का मुखौटा नहीं ओढ़ा। 'मनुष्य हूँ' कविता में यह भाव देख सकते हैं-

कवि हूँ पीछे पहले तो मैं मानव हूँ

'अतिमानव' या लोकोत्तर किसको कहते हैं

वही जनता,

कबसे जानूँ?

सुख सुविधा में हुलस-हुलसकर

दुःख दुविधा झुलस-झुलसकर

सब जैसे अपने जीवन को बिता रहे हैं

वैसे मैं भी अपना जीवन बिता रहा हूँ।

यह सही है कि नागार्जुन ने अपनी कविताओं में ग्राम परिवेश के चित्र उपस्थित किए हैं। वह केवल दिखाने के लिए नहीं बल्कि शोषित-पीड़ितों की दयनीय दशा दिखाने के लिए

REVIEW OF LITERATURE ON MICROFINANCE AND WOMEN EMPOWERMENT

Dr. Jagadeesh.B, Assistant Professor, Department of Commerce, University College, Mangalore, Karnataka, India.

Abstract

The emergence of women entrepreneurs and their contribution to the national economy is quite visible in India. The number of women entrepreneurs has grown over a period of time, especially in the 1990s. Access to savings and credit can initiate or strengthen a series of interlinked and mutually reinforcing 'virtuous spirals' of empowerment. Microfinance programmes like the Self-Help Bank Linkage Programme (SHG) in India have been increasingly hailed for their positive economic impact and the empowerment women. This is based on the view that women are more likely to be credit constrained, have restricted access to wage labour market and have limited decision-making and bargaining power within the household. The present study is undertaken for review of literature on microfinance and empowerment women.

Key words: Microfinance, Self Help Groups, entrepreneurship, empowerment.

Microfinance development has emerged as major strategy to combat the twin issues of poverty and unemployment that continue to pose a major threat to the polity and economy of both the developed and developing countries. A number of agencies- Government as well as Non-government Organizations- are, today involved in micro-finance development initiatives. From the early 1970s, women's movements in a number of countries identified credit as a major constraint on women's ability to earn an income and became increasingly interested in the degree to which poverty-focused credit programmes and credit cooperatives were actually being used by women. SEWA in India, for example, set up credit programmes as part of a multi pronged strategy for an organization of informal sector women workers.

Microfinance: Microfinance is a broad term that includes deposits, loans, payment, services and insurances to poor. The concept of microfinance and micro-credit are used interchangeably. But micro-credit does not include savings; hence microfinance is more appropriate term.(Manimekalai,2004).It was observed that Microfinance often gets equated merely as credit for micro-enterprises while the poor also need savings, consumption loans, housing loans and insurance services. By the definition of microfinance we understand that it is a provision of thrift, credit and other financial services and products of very small amounts to the poor in rural, semi-urban or urban areas for enabling them to raise their income levels and improve living standards.

Empowerment

Microfinance and Financial Inclusion

Dr. Jagadeesh.B. Assistant Professor, Department of Commerce, University College,
Mangalore, Karnataka, India.

Abstract

Financial inclusion is delivery of financial services at an affordable cost to the vast sections of the disadvantaged and low-income groups, providing them with timely and adequate access to the financial products, services like Bank Accounts, Savings Products, Remittances & Payment services, Insurance, advisory services, Entrepreneurial and Micro credit. Micro finance. An initial effort has been made for the widespread network of banking system through the establishment of Regional Rural Banks, Microfinance Institutions, Self Help Groups etc with the objective of providing easy and timely finance. Despite of various initiatives undertaken, there are still many obstacles cropping up in attaining Financial Inclusion. Hence, both public and private sector institutions should work together to overcome these challenges and contribute towards Inclusive Growth.

KEYWORDS: Financial Inclusion, Microfinance, Self-Help Groups (SHGs), Bank Linkage Programme.

Financial Inclusion is a very important initiative for the sustainable growth of a country. With a huge rural population, that is economically challenged, Government in India has rolled out many initiatives like Rural Employment Guarantee Scheme, Sarva Shiksha Abhiyan (Education for All), Bharat Nirman Programme. But to support the growth, a committee on Financial Inclusion (FI) was also formed in June 2006, with Dr. C Rangarajan as Chairman to recommend a strategy to achieve a higher Financial Inclusion in the country. India in last 15 years has witnessed unprecedented growth in financial services, unfolded by liberalization and globalization of financial services due to adoption of Information Technology and unlocking of the regulatory framework. But alongside this positive development there are evidences that the formal financial sector still excludes a large section of population.

As on March 2006, the saving accounts per 100 adult populations were 63 and credit accounts were only 16 in all India (RBI, BSR 2006). In 1992, India's National Bank for Agricultural and Rural Development (NABARD) piloted the concept with 500 groups. Since then, the SHG movement has witnessed tremendous growth that brought about one of the world's largest and fastest-growing networks for micro-finance. In 2007, some 40 million households were organized in more than 2.8 million SHGs that borrowed more than US\$ 1 billion of credit from banks in 2006/7 alone (Reserve Bank of India 2008). Cumulative credit disbursed to SHGs amounted to some US\$ 4.5 billion (or about 10% of total rural credit) in India.

Financial inclusion in India

The Reserve Bank of India has set up a commission (Khan Commission) in 2004 to look into financial inclusion and the recommendations of the commission were incorporated into the midterm review of the policy (2005-06). In the report RBI exhorted the banks with a view of achieving greater financial inclusion to make available a basic "no-frills" banking account. In India, Financial Inclusion first featured in 2005, when it was introduced, that, too, from a pilot project in UT of Pondicherry, by K C Chakraborty, the chairman of Indian Bank. Mangalam Village became the first village in India where all households were provided banking facilities. In addition to this KYC (Know your Customer) norms were relaxed for people intending to open

ABSTRACT

According to a research conducted by Harvard University, the Carnegie Foundation and Stanford Research Centre, 85 per cent of job success comes from having well-developed people skills or soft skills and only 15 per cent of job success comes from technical skills or knowledge (hard skills). It has been highlighted that soft skills play a crucial role in increasing the chances of the candidates to get an employment. Technically, it helps the candidates improve their employability skills.

The present paper intends to determine student awareness and perception towards the prominence of soft skills among the under graduate students from the employment point of view. A total of 150 under graduate students from 10 Government & Private (including aided) educational institutions each randomly selected from D K District of Karnataka. It will be analysed by using percentage technique. Required data are collected from the structured questionnaire.

INDIAN ECONOMY IS IN TRANSITION: PROSPECTS AND CHALLENGES OF
COOPERATIVES

Dr. Jayavantha Nayak^{*}
Associate Professor & Coordinator, Department of P.G. Studies in Economics, University College,
Mangalore

Abstract

A Cooperative is a unique form of business used by people and businesses for their mutual benefit. Cooperatives are community-based, rooted in democracy, flexible, and have participatory involvement, which makes them well-suited for economic development. An economy based on one form of business organization alone is neither desirable nor possible in modern times. To justify their existence and fulfil their purpose, cooperatives must make a significant and unique contribution to solving some of the massive problems facing mankind today. Economic reforms during the 1990s boosted economic growth, but high level of poverty and unemployment persist in India. Neither the private sector nor the public sector can promote social welfare. India requires meaningful reforms in the cooperative sector.

Keywords: Indian Economy, Transition, Prospects, Challenges, Cooperative sector

Introduction

PM Modi announced a mega economic stimulus package on May 12, 2020, amounting to Rs 20 lakh crore, under the **Atma Nirbhar Bharat Abhiyan**. The focus of the package is about achieving self-reliance by giving thrust on two themes: **vocal for local and local to global**. Agriculture and allied sectors such as animal husbandry and especially dairying, are an example of Atma Nirbharta where self-sufficiency (in milk production) was achieved decades ago.

At the time of independence, India was primarily an agrarian economy, with three-fifths of output originating from agriculture. In the 73 years since independence, there has been a significant transformation of economic activity away from agriculture, with less than a fifth of the output now originating from agriculture, and the rest from manufacturing and services. India has become one of the fastest growing economies of the world. The growth of the economy has been very fast in the last 25 years or in other words, after the introduction of economic reforms in 1991. Contributing to this acceleration is a broad series of reforms including financial sector reforms, increased globalization, and the widening and deepening of product and financial markets. But these reforms could not contribute to the equal distribution of economic development in all the sections of society. The operational structure of the Indian economy changed completely as it became more open for global perspective.

However, recently, the Indian economy witnessed recessionary trend. India has never faced a sustained long-term downturn in economic activity in its 73 years of existence as an independent country. Further Covid 19 impact added fuel to the fire. The economic impact of the 2020 coronavirus pandemic in India has been largely disruptive. In this context, an attempt has made to examine the role of cooperatives in the Indian economy.

A Co-operative is a unique form of business used by people and businesses for their mutual benefit. Cooperatives are community-based, rooted in democracy, flexible, and have participatory involvement, which makes them well-suited for economic development. An economy based on one form of business organization alone is neither desirable nor possible in modern times. To justify their existence and fulfil their purpose, cooperatives must make a significant and unique contribution to solving some of the massive problems facing mankind today.

Objectives of the Study

This study aims at examining the prospects and challenges of cooperatives in the present context in India in general. The specific objectives of this study are

1. To examine the relevance of the cooperative sector in the Indian economy;
2. To discuss prospects of cooperatives in the changing context of globalization;

PUBLIC NOTICE

The Quality Mandate of the UGC emphasizes importance of promoting quality research by the faculty and creating new knowledge. Number of research articles published in reputed journals is one of the globally accepted indicators considered for various academic purposes including institutional ranking, appointment and promotions faculty and award of research degrees. Credibility of research publications is extremely important because of it presents individual, institutional and national image. High-quality publications in reputed journals help in achieving higher global ranks and overall improvement of quality of education. Publications in dubious sub-standard journals reflects adversely leading to long term academic damage and tarnishing of image. A problem of dubious /sub-standard journals has become a serious concern all over the world. The percentage of research articles published in poor quality journals is reported to be high in India, which has adversely affected its image. UGC-approved list of journals was created with an intention to help academic fraternity to bring measurable parameters, for the purpose of various academic evaluation of individuals and institutions.

Over this background, with a view to refine and strengthen UGC approved list of journals, the whole issue was reconsidered by the Commission in its meeting held on 14th November, 2018.

The Commission has approved following approach:

- (i) Research Journals in disciplines under Science, Engineering, Technology, Agriculture and Bio Medical Sciences are well covered in globally accepted scientific database like SCOPUS and Web of Science (WOS). Therefore, journals indexed in SCOPUS and WOS may be considered for all academic purposes in these disciplines.
- (ii) For other disciplines such as the Social Sciences, Humanities, Languages, Arts, Culture, Indian knowledge systems etc., a list of credible quality journals needs to be prepared and maintained. For this purpose, a Consortium of Academic and Research Ethics (CARE) may be established.

Contd...../-

- (iii) The CARE may involve all the Statutory Councils/ Government bodies in Social Sciences, Humanities, Arts and Fine Arts, Science, Medical, Agriculture and Engineering and the Association of Indian Universities (see the list in Annexure). INFLIBNET will also be a member of the consortium as a supporting agency. CARE will be chaired by UGC Vice Chairman.
- (iv) The responsibility of analysing Journals from all disciplines and to submit recommendations to CARE should be entrusted to suitable institution that has proven track record in the journal analysis and publication ethics. The institution that has been entrusted responsibility of analysing journals shall create special cell which shall function under the guidance of empowered committee appointed by the UGC.
- (v) Members of the CARE would prepare lists of quality journals in their respective disciplines within a defined time-frame. These lists will be critically analysed and curated for the quality of the journals by a special cell at the entrusted institution using defined criteria.
- (vi) Based on reports received from the special cell at entrusted institution a dynamic 'Reference List of Quality Journals', will be maintained by CARE (hence forth referred as "CARE Reference List of Quality Journals"). The "CARE Reference List of Quality Journals" will be used for all academic purposes.
- (vii) Journals published by government / councils/ national academies/ scholarly societies of long standing in India and abroad may be also considered for inclusion in the "CARE Reference List of Quality Journals" provided they meet the required quality criteria.
- (viii) The CARE should also create a process for submission of proposals by the academic institutions for inclusion of new journals in the "CARE Reference List of Quality Journals" in different disciplines. All such proposals will be critically analyzed using validated protocol by a special cell at the entrusted institution and if found appropriate, would be recommended to CARE for possible inclusion in the "CARE Reference List of Quality Journals".
- (ix) **The existing 'UGC approved list of journals' will remain valid till "CARE Reference List of Quality Journals" is released.**
- (x) The "CARE Reference List of Quality Journals" will be regularly updated and published by the UGC and the members of the Consortium at their respective websites.

Contd.../-

- (xi) A suitable Advisory will be issued to create awareness amongst the students, academia and other stakeholders about the issue of predatory/sub-standard journals and the academic fraternity should especially be advised not to be associated with predatory/sub-standard journals/ publishers in any manner.
- (xii) A suitable Advisory will also be issued to the universities/colleges and other academic institutions emphasizing the roles of valid and quality-driven criteria and of the Selection/Expert Committees in the process of academic evaluations for various purposes. Evaluation of the Research Output of candidates/institutions has to be based on quality of published work rather than merely on number of publications/impact factor/citations.

Site Suitability Analysis for Municipal Solid Waste Disposal in Mangalore City Corporation, Karnataka - Using Geospatial Technology

Sandipta Das¹, Dasharatha P. Angadi²

¹Research Scholar, Department of Geography, Mangalore University

²Associate Professor & Research Guide, P. G. Department of Geography, Mangalore University, Department of Geography, Mangalagangothri-574 199

Abstract: Solid waste dumping is a challenging issue now-a-days in urban extent. The solid waste produced in municipality areas (ULB) of Indian cities which impacts on health as well as the surrounding environment. The first requirement to dumping urban solid waste in our Indian cities is a suitable land site. Mangalore taluk is a second populated taluk of Dakshin Karnataka, side by it is being a fast developing city where solid wastes generating average 220 (TDP) tons per and 0.35kgs/capita/day which is also facing challenges to dumping to a suitable place. The objective of present study was the urban solid waste dumping site selection using the geospatial techniques for Mangalore City Corporation area. Remote Sensing and GIS multi-criteria analysis (MCA) methods were used to identifying the suitable site for disposal urban solid waste. Landsat ETM+ and SRTM DEM data were used for present paper. Estimation of buffer distance analysis and overlay weightage procedure was used for this study. The finding result has been indicates that only 6.45 km² (3.93%) area is suitable for solid waste dumping; otherwise 17.289.km², 77.31 km² and 62.95 km² area are fall under unsuitable, less suitable and moderate suitable with 10.54%, 47.13% and 38.39% respectively.

Keywords: Solid waste Generation; Suitable Dumping site; GIS and Remote Sensing;

1. Introduction

Solid waste is annoying ingredients which made from collective domestic, residential, industrial and commercial actions in a particular area. Solid waste generation in India has been increasing over the years from 100 grams per person per day in small towns to 500 grams per persons per day in large towns (Jaybhaye, Mundhe, & Bhalachandra, 2014). It's put major impacts on human health and surrounding environment due to the improper and instinctive solid waste dumping. The ground water quality, drinking water purity has been reduces due to unscientific landfill site and its causes the disease like nausea, jaundice, asthma etc. (Bean et al., 1995). Increasing population in urban extend due to rural to urban migration which leads to increase solid waste generation in smaller to bigger cities in India. Solid waste disposal is an important part of waste management to protect the surrounding environment. According to the Municipal Solid Wastes (MSW) rules, 1999 every municipal authority has to take in charge for collection, segregation, stores, transportation processing and disposal of municipal solid waste. It comes under some schedule i.e., (i) implementation schedule, (ii) collection, separation, storage, transportation, assembled and disposal of municipal solid waste, (iii) identified for land filling, suitable site selection, prevention of pollution, water quality monitoring, ambient air quality monitoring and post care and (iv) processing and composting. MCC has been generates Municipal Solid Waste is about 220 TDP (tons per day) and collection is about 200 TDP, 0.35kgs/capita/day. In three major ways solid waste is generated in MCC like municipal, biomedical, hazardous industrial waste. There are two ways to collect solid waste in Mangalore City Corporation. One is primary collection and another is secondary collection. Primary collection is mostly deals with door to door collection and street sweeping. As per CSP of MCC report, corporation has collected waste by door to door 56.4% of total house hold population in 2011 and 12% from slum house hold. Slum residents are used to practice throw waste directly on road site bin and open drainage. Solid waste collection report of Corporation reveals that amount of Domestic waste generated 88.87 TDP; commercial area generated 45.50 tons per day; construction and street sweeping waste generated 1, 27.27 TDP respectively. Monthly wise waste generated of MCC are 3300, 2190, 540, 60.0 and 90 MT from domestically, commercial, Street sweeping, Slaughter, Houses, Industries and Construction. To find the suitable solid waste disposal site of municipal areas, it is an important to considered some basic parameters like physical, socio-economic and land use factors for people safety even though limited land resources in urban areas. The collection of waste system from Slum areas and non-slum areas are more or less 'Good; only 10% to 12 % are 'Bad'. Remote sensing and GIS techniques are a new kind of aid that can solve out problem of cost effectively. This technique supports to selecting a suitable site for dumping waste considering all the necessities criteria. The present study discussed about the selecting suitable site for disposal of municipal solid wastes in Corporation area using Multi Criteria Analysis of GIS techniques based on physical, socio-economic parameters. The rule is used to give rank wise alternatives under the consideration. The ranking depends upon the decision maker is preference. Eight parameters have been taken into consideration to build suitability dumping site in Mangalore City Corporation. Create buffer distance from each parameters using multiple buffer tools and again reclassify of it using spatial analyst tools in ArcGIS and finally suitability site map has been detect on the based on raster calculation of each parameter.

22. The Status of Gender disparity in Haveri district: A Geographical Approaches - Deepika Devaramani, Dasharatha P. Angadi

VOLUME - VII, ISSUE - IV - OCTOBER - DECEMBER - 2018
AJANTA - ISSN 2277 - 5730 - IMPACT FACTOR - 5.5 (www.sjifactor.com)

15. The Status of Gender Disparity in Haveri District: A Geographical Approach

Deepika Devaramani

Research scholar, P. G. Department of Geography, Mangalore University, Mangalagangotri,
Karnataka, India.

Dasharatha P. Angadi

Associate Professor, Research Guide, P. G. Department of Geography, Mangalore University,
Mangalagangotri, Karnataka, India.

Abstract

The current status has seen the greatest gender disparity that is reflected in the relationship between the male and female literacy, education, employment, socio-cultural and behavioral indicators of empowerment. Gender equality is more than a goal in itself. It is a prerequisite for tackling the challenges of poverty reduction, promoting sustainable development and building good governance.

The present paper examines the extent of gender disparity in Haveri District based on literacy and sex ratio using secondary data such as District Census Hand Book of Haveri District. Literacy rate has been calculated for the population above 6 year and Sopher's Disparity Index (1974) modified by Kundu and Rao (1983) has been employed for the measurement of male-female disparity in literacy. It is perceived that, in all taluks of Haveri district, experiences greater regional disparities in the literacy and sex ratio. We found that literacy rate in study area was 67.79% in 2001 which is increased to 77.4% in 2011. We also found that the urban literacy is significantly greater than the rural literacy which is coexisting to the wider gender disparities from the rural to the urban population in the study area. Similarly we also found that sex ratio in the study area was 944 in 2001 which is increased to 950 in 2011. There are wide disparities from Rural to Urban sex ratio. The urban sex ratio is higher than rural sex ratio in study area. The Rural sex ratio is 946 and urban sex ratio is 968 females per thousand males in the 2011.

Keywords: Literacy, Sex ratio, Gender, Disparity, etc,

Introduction

The human sex ratio (conventionally defined as the number of females per 1000 males) and literacy varies greatly between district to district and state to state. Das Gupta

12. Constant Learning and Professional Advancement - A Empirical Study on Faculties

Dolan Champa Banerjee

Assistant Professor, St. Agnes College (Autonomous), Mangaluru.

Dr. Yatish Kumar

Associate Professor & Research Guide, Department of Commerce, University College Mangaluru.

Abstract

Learning helps one to build respective acumens which eventually help them to explore beyond boundaries and can move towards professional advancement. David D Dill (1999) in his study evaluated that over the last decade universities have been subjected to various forms of academic accountability designed to maintain or improve the quality of their teaching and learning. A shared perspective of many of these accountability processes is that universities become skilled at creating knowledge for the improvement of teaching and learning, at modifying the behaviour to reflect this new knowledge. In short, those universities become "learning organizations".

As quoted by A.P.J. Abdul Kalam, "You cannot change your future, but you can change your habits and surely your habits can change your future". Good habits play a very important role in one's life and profession. Constant learning should be a habit. Sometimes external push can be negligible but internal push should be so aggressive that one builds acumen and crosses different boundaries in the professional front.

Keyword - Learning, Development, Professional advancement

1. Introduction

According to Albert Einstein "Once you stop learning, you start dying". Continuous learning helps individuals to grow vertically and horizontally. We stay in an ever changing environment. Every new day, every new hour, every new minutes is a game changer. To survive in this ever changing environment one has to be a constant learner.

Learning helps one to build respective acumens which eventually help them to explore beyond boundaries and can move towards professional advancement. David D Dill (1999) in his study evaluated that over the last decade universities have been subjected to various forms of

DEVELOPMENT INITIATIVES BY RELIGIOUS INSTITUTIONS

Dr. JAYAVANTHA NAYAK

Associate Professor, Department of Economics
University College, Mangalore

Dr. RAMAKRISHNA B.M

Associate Professor, Department of Economics
University College, Mangalore

Abstract : Economic activity and religion have a deep relationship. They both influence each other. This inter-relationship is of ancient origin. In other words religious factors can be linked to the social and economic development of India since the emergence of the first civilization on the Indus around 4,500 years ago. There are numerous studies examined how religious institutions like Temples, Churches, Mosques etc have impact on society in general. However, there is a paucity of studies looking specifically at how religious institutions contribute for the neighborhood development by taking up developmental activities via income generated out of religious activities. In this study, a special focus has made on to analyze the contributions of religious institutions in neighbourhood development.

Keywords: Development, Initiatives, Rural, NGOs Religion, Institutions

Introduction

India has long been known as a very spiritual, religious heavy area of the world. In India, religion is a way of life. It is an integral part of the entire Indian tradition. For the majority of Indians, religion permeates every aspect of life, from common-place daily chores to education, and politics. Recent academic interest linking religion and development has centered on the economics of religion. Studies in the economics of religion have focused on applying the tools of modern economic analysis to the analysis of religious institutions, faith-based welfare programmes and development initiatives taken by them for the neighborhood development. The present study aims at an analysis of role played by the religious institutions in development process in rural area of Dakshina Kannada District. There are numerous studies examined how religious institutions like Temples, Churches, Mosques etc have impact on society in general. However, there is a paucity of studies looking specifically at how religious institutions contribute for the neighborhood development by taking up developmental activities via income generated out of religious activities. In this study, a special focus has made on to analyze the contributions of religious institutions in neighbourhood development. An attempt is also made to shed light on early writings pertaining to religion and development. In this paper an attempt has made to examine the contributions of religious institutions such as Temples, Churches, and Mosques of Dakshina Kannada District of Karnataka State. In this study, a special focus has made on to analyze the contributions of a reputed pilgrimage centre of Dakshina Kannada District 'Shri Kshetra Dharmasthala' in the field of rural development. This study also attempts to answer the following questions-

1. Whether religious institutions contribute for the development process?
2. Is there any positive relationship in between religious institutions and rural development?
3. What are the positive strengths of religious institutions to promote rural development programmes?

THE METHODOLOGY:-

Taking into account the fact that religion is a complex and multidimensional phenomenon, it is almost impossible to examine religion and its specific relationships to development: economic, social and cultural. Here an attempt is made to evaluate the contribution of development initiatives taken up by the religious institutions. The present study is based on primary source and secondary source of information. The primary information concerned to the research work collected through different sources. It includes structured interview schedule, discussion with beneficiaries, discussion with volunteers,

Banking the Demographic Dividend through Inclusive Growth in India

Dr. Jayavantha Nayak

Associate Professor, Department of Economics, University College, Mangalore.

For decades, economists and social thinkers have debated the influence of population change on economic growth. India is presently in the early part of its demographic dividend. However, unless lessons are learnt from other parts of the world, and adequate measures are taken both at the ground and policy levels, it is possible that India will be unable to reap its demographic dividend, and may in fact jeopardize its future as a result of inadequate action. Demographic transition is the window of opportunity for implementation of development oriented Government policies. This one-time gift of the demographic transition is expected to provide lots of opportunities for development and economic gains. To reap the benefit of demographic dividend government has to implement appropriate policy. Reforms undertaken in the early 1990s made India one of the world's fastest growing. This study explores banking the demographic dividend through inclusive growth in India.

Methodology

This paper is descriptive and analytical in nature. Here an attempt has made to discuss the possibilities of reaping demographic dividend through inclusive growth in India. The present study is based on secondary source of information. Information has gathered through various sources such as books, journals, Planning documents, gazetteer, website, government records etc.

Demographic Dividend for India

The demographic dividend- this phenomenon occurs with a falling birth rate and the consequent shift in the age structure of the population towards the adult working ages. It is also commonly known as the demographic gift or bonus or demographic window. With many developing countries particularly in the Asian continent experiencing a rapid decline in fertility, there has been widespread optimism that the demographic bonus will take these countries to greater economic heights [Asian Development Bank 1997, Bloom and Williamson 1998, Cyrus Chu and Lee 2000, Mason 1988].

Due to improved health care facilities in India, the death rate is on decline, this indicate that by the year 2016 persons above age of 60 will increase and will be 8.94% of the total population. The below mentioned table furnishes details regarding demographic composition in India in different periods of time.

Economic Inclusion and Women Empowerment

Dr. Jayavantha Nayak

Associate Professor, University College Mangalore.

Dr. Ramakrishna B. M.

Associate Professor, University College Mangalore.

Introduction

The status of women in modern India is a sort of a paradox. If on one hand she is at the peak of ladder of success, on the other hand she is mutely suffering the violence afflicted on her by her own family members. As compared with past women in modern times have achieved a lot but in reality they have to still travel a long way. Their path is full of roadblocks. The women have left the secured domain of their home and are now in the battlefield of life, fully armoured with their talent. They had proven themselves. But in India they are yet to get their dues. The sex ratio of India shows that the Indian society is still prejudiced against female.

Scope and Objectives

This study explores the importance of women empowerment and inclusive growth to achieve sustainable development in Indian economy. For growth to be sustained in the long run, it should be broad-based across sectors and different sections of the society. Recognising that inclusive growth begins with children and women, special focus has made under the XII Five Year Plan to achieve this goal. The objectives of the study are as follows-

1. To review the existing condition of women in India.
2. To analyze the achievement done under past Five Year Economic Plans.
3. To review the existing strategies, policies, programmes for women empowerment in India.
4. To suggest remedies for achieving women empowerment goals in India.

Methodology

This paper is descriptive and analytical in nature. Here an attempt has made to discuss the existing condition of women in India and various measures and schemes introduced under current Five Year Economic Planning to overcome from this problem. The present study is based on secondary source of information. Information has gathered through various sources such as books, journals, Planning documents, gazetteer, website, government records etc.

The Concept of Women Empowerment

Swami Vivekananda had said "That Country and that Nation which does not respect Women will never become great now and nor will ever in future" and pursuit of making India a great nation we need to

28 Role of Geo-Information Technology in Promoting Rural Development and Inclusive Growth in India

Dr. Jayavantha Nayak

Associate Professor, Department of Economics, University College, Mangalore

Introduction

Geographic Information Technology has developed at a remarkable pace over the past two decades and will play a key role in development of nations in the 21st Century, thereupon many countries have already prepared their strategic development plans for application of GIS Technology with gigantic financing endeavours. Now time has come for all decision makers to discuss the appropriateness of GIS technology and its applications to rural development, forest management, urban development planning, land information systems and agricultural development. This will also provide a suitable solution for the use of GIS for educational infrastructure development with special emphasis on rural sector in India.

Objectives

The various objectives of the study are discussed below

- 1) To discuss the applications of GIS in promoting rural development and inclusive growth of India
- 2) To focus on need for inclusive growth in India
- 3) To highlight the importance of information technology in rural development
- 4) To suggest remedies for promoting rural development and inclusive growth in India

Methodology

Rural development is a multi-dimensional phenomenon. Qualitative and quantitative factors are involved in rural development process. It is very difficult to evaluate rural development and inclusive growth only with one variable like GIS. However in general an attempt has made in this paper to discuss the role played by GIS in rural development and inclusive growth of India. This paper is descriptive in nature. Information is gathered through secondary sources like articles, books, website, gazetteer, journals etc.

Need for Inclusive Growth in Indian Economy

Inclusive growth is a major concern for rural development in India with rising inequalities. Despite tremendous growth of economy, failure on distributive front has aggravated the progressive journey towards collective well-being. Inclusive growth has become the buzzword in policy-spheres with recent phenomenon

Abstract

Objective: - To make mobile banking system adaptable with easy hands on access to its beneficial features among Indian banking customers with high end access to digital payment system.

Methodology: - An empirical study comprised a sample of 170 respondents were data was collected based on convenience sampling through a structured questionnaire created on five-point likert scale.

Data Analysis: - Mean and t-test was applied to identify the results.

Conclusion: - Banks must take collective efforts to organize campaigns to make customers aware about the benefits of mobile banking in order to make them adopt the technology as the future of Indian banking relies on technology-based devices.

Keywords: Mobile banking; Adoption intention; customer adaptability, features of M-banking

Introduction

With time, banking has risen beyond its conventional model of customers waiting in line while banks rendered their services, to now making their services available to customers round the clock. For businesses all around the globe, technology has proved to bring about intense development. The banking industry has continually explored the chance for innovation to give its customers a

13. Analytical Survey of Interest and Background of Education Trainees about Physical Education Programme”. - Dr. Keshava Murthy.

ANALYTICAL SURVEY OF INTEREST AND BACKGROUND OF TEACHER EDUCATION TRAINEES ABOUT PHYSICAL EDUCATION PROGRAMME

Dr. KESHAVAMURTHY T

Asst. Director of Physical Education, Department of Physical Education
Mangalore University, Mangalagangothri -199.

ABSTRACT

The study was confined to teacher education trainees' interest and background of physical education in anticipation that the teacher trainees would have sufficient background of physical education and sports in their school time studies. Teacher trainees' were also expected to given their volunteer service for the development of physical education and sports programme in their institutions. Physical education is a typical field, which demands inter-personnel relationship with administrators, teachers, student leaders and publics for its meaningful management. Each institution, with the exception of few, may have only one physical education teacher and most of them find it difficult to cope-up with the physical education programmes. Thus the education trainee when becoming a full-fledged teacher would also learn to help the students in their physical education and sports programme so as to achieve their desired goals. In the absence of such co-ordination, students as well as the society will suffer a great loss.

A questionnaire on five points scale and also for the negative questions reverse five points scale has been awarded, it consisting of 28 questions was logically framed with the assistance of experts in the field to know teacher trainees' interest and background of physical education programme. The questionnaire was administered to 100 randomly selected B.Ed. students from six educational institutions of Mangalore University, Mangalore and opinions were collected from them. The response mainly revealed that, teacher trainees had good interest and background of physical education and sports programme. The responses also uncovered important beneficial aspects of physical activities, such as mental soundness, social behavior, good health and pleasure. The study recommended that, vocational short term orientation training programmes at various levels should be organized to the teachers for effective implementation of physical education and sports programmes.

INTRODUCTION:

Education is considered as a cultivating, nurturing and fostering process, dealing with the total development of the moral, intellectual and physical processes of the individual. In order to achieve this, societies have established educational institutions and evolved a sound programmes catering to the needs in all endeavors of education. But scrutiny of the programmes of the educational institutions in India reveals that a greater part of the institutions' working time is devoted to the
